(57) Abstract :
Ethosomes to increase the permeation of the skin rates. To increase the patient compliance by reducing dosing frequency through sustained release Vesicular device for the delivery of drugs like ethosomes. It provides prolonged drug delivery and enhances topical drug delivery of calcipotriol. The drug is evaluated by the preliminary tests as color, odor, appearance, melting point, solubility, infrared spectra, determination of max and calibration curve.

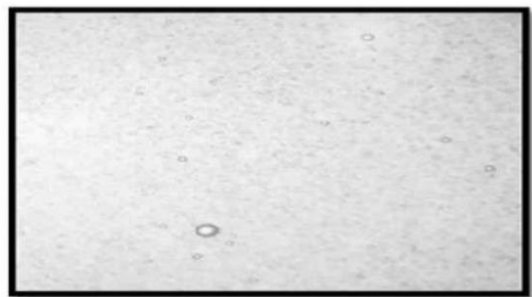

Fig 1 Motic microscopic image of ethosomes.
