(57) Abstract :
The present invention relates to polyherbal syrup for diabetes mellitus and process for preparation thereof. Further invention relates to formulate herbal syrup formulations comprising crude extract of fenugreek seeds, basil leave, Karela, Paneer phool, Lemon and Honey with or without other pharmaceutical acceptable excipients in order to obtain antidiabetic formulations with more effective oral hypoglycemic activity, less side effects, increased patient compliance thereby providing multifaceted benefits. The formulation of the present invention not only efficiently controls the Type 2 diabetes but also offers reversal possibilities in pre-diabetes and thereby a possible preventive option for Type 2 diabetes mellitus and the associated complications.
